A photograph of a modern office common area. In the foreground, a group of five people are gathered around a long wooden conference table, engaged in a discussion. The room features a mix of seating, including high-top stools and low-profile lounge chairs. A large window with a perforated metal screen is visible in the background, letting in natural light. The overall atmosphere is professional and collaborative.

Why storytelling?

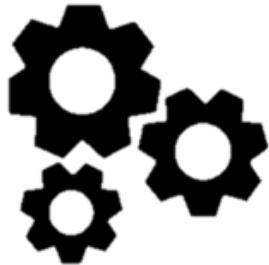

Classic reports

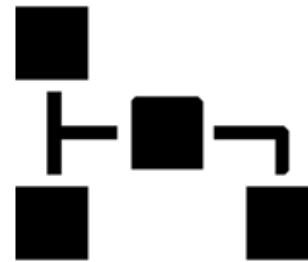

What we used to do

Collect

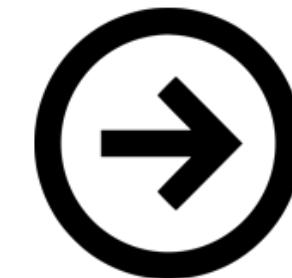

Transform

Model

Analyze

Define

Storytelling, How and why?

How = Usage of data

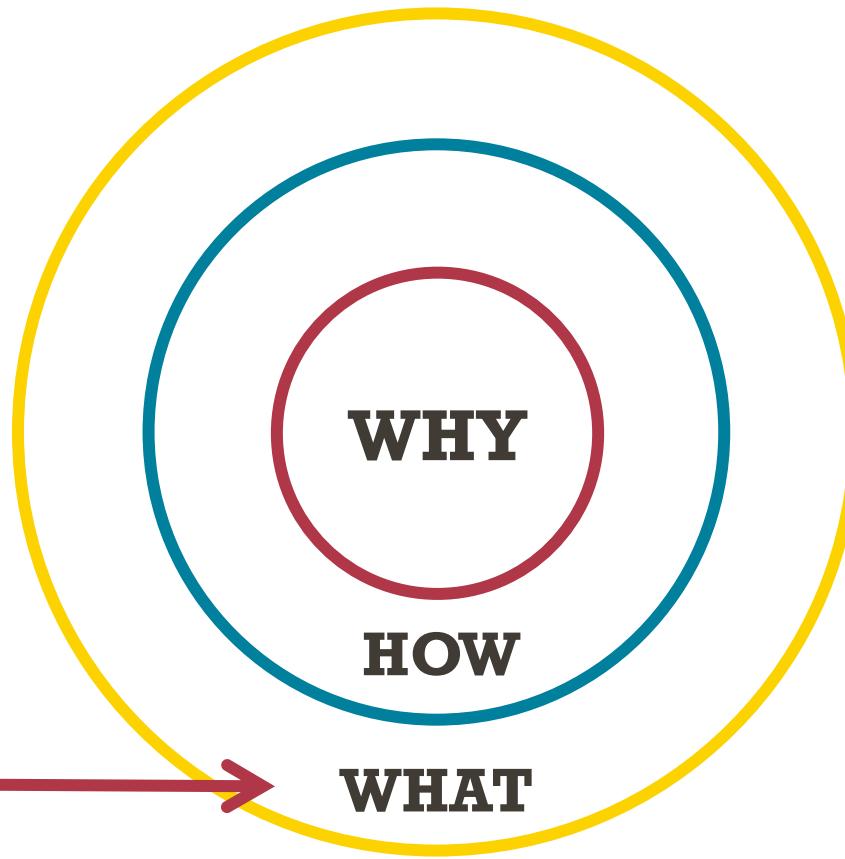

Why = Business understanding

What as a starting-point

We are good at:

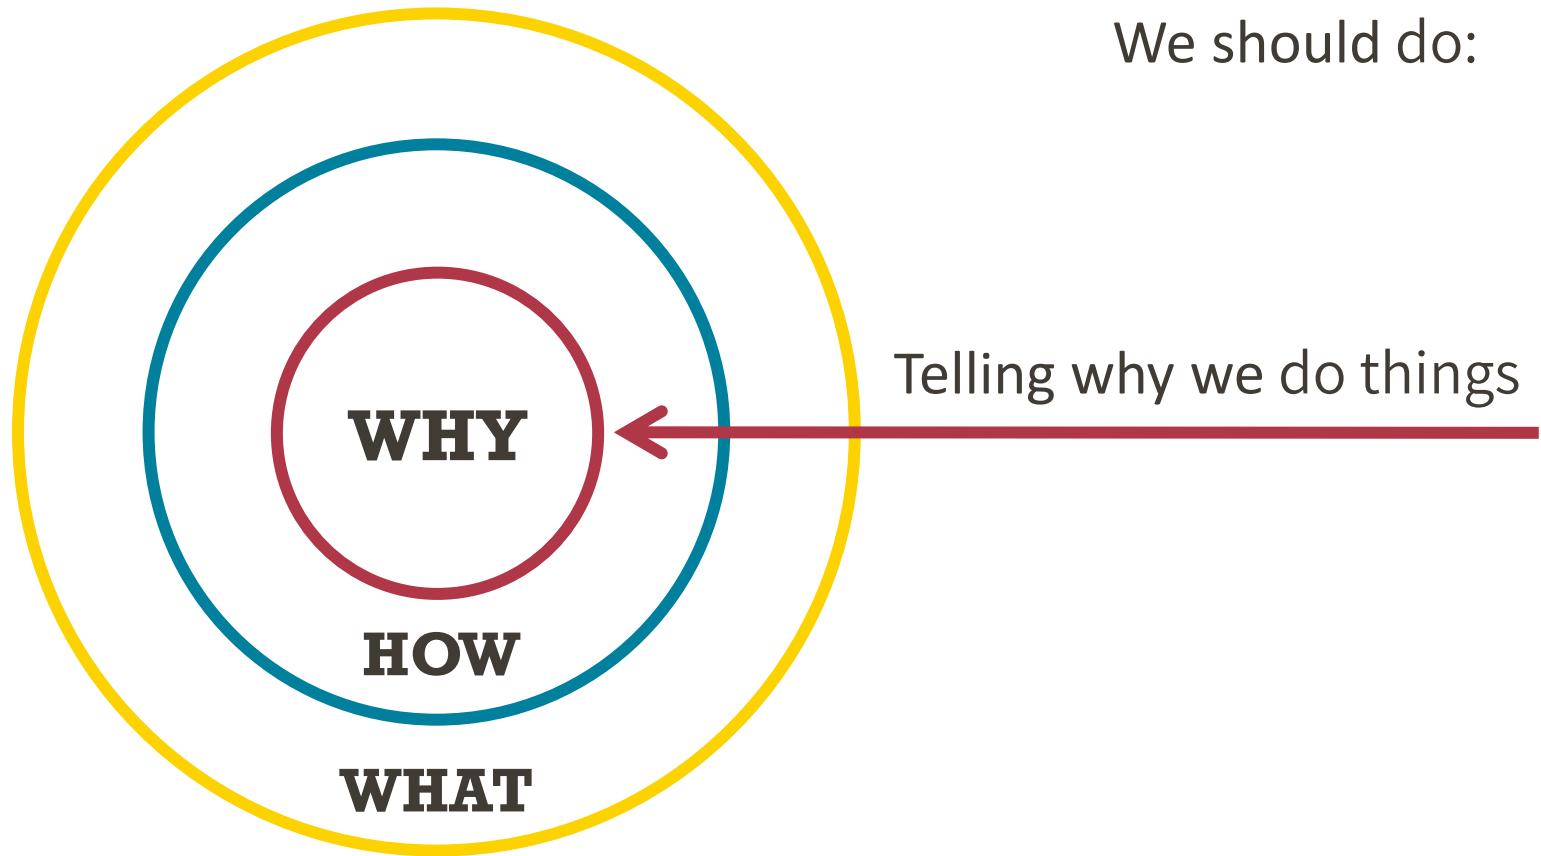

We should do:

Telling what we do

Why as a starting-point

We are good at:

The definition of storytelling

Data storytelling is the process of translating data analyses into layman's terms in order to influence a **business decision** or **action**.

Once upon a time ... <sob>

Goals of storytelling

- Transfer of information which is interpreted correctly
- The origin of the question
- Possibility to answer the next question
- Motivation for data-driven decisions
- Connected to business processes

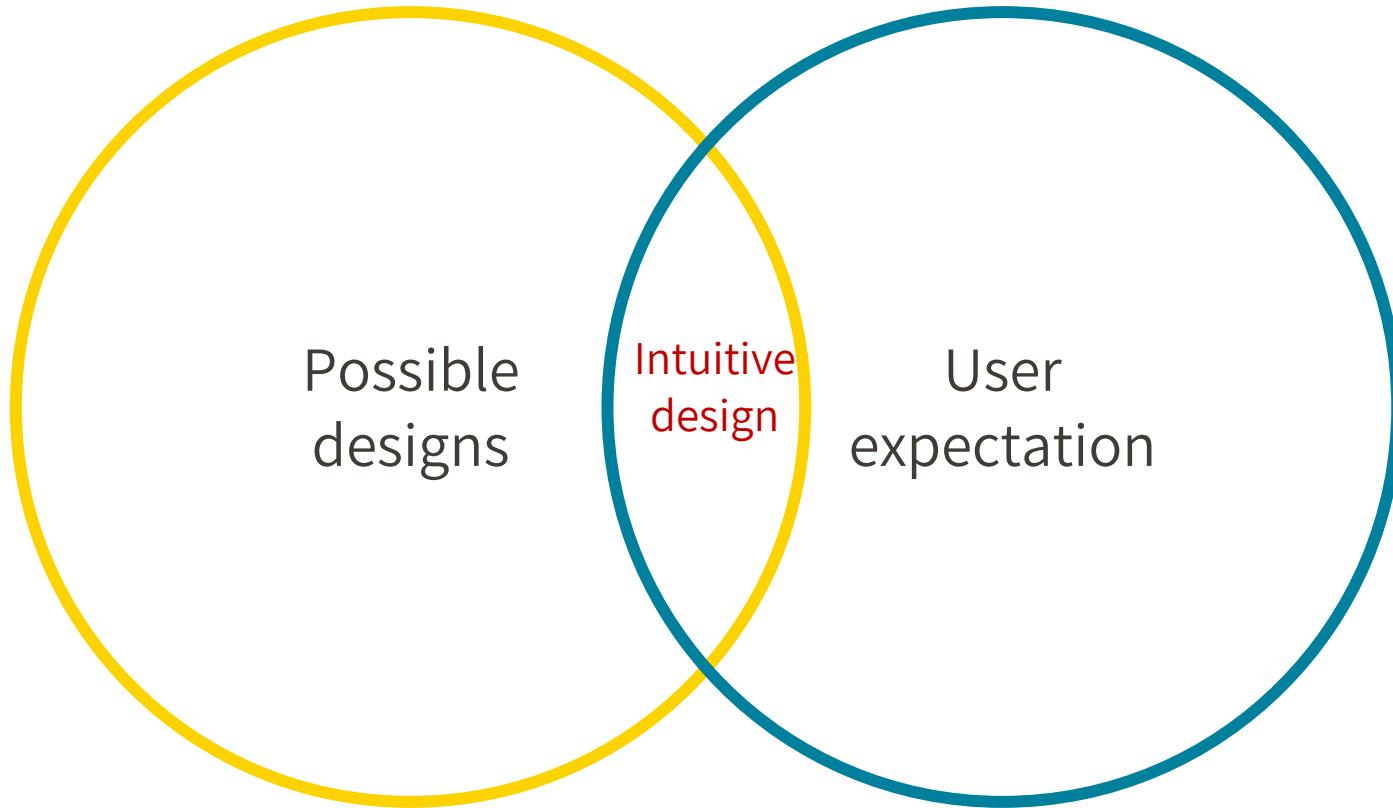

Practical use & some additional features

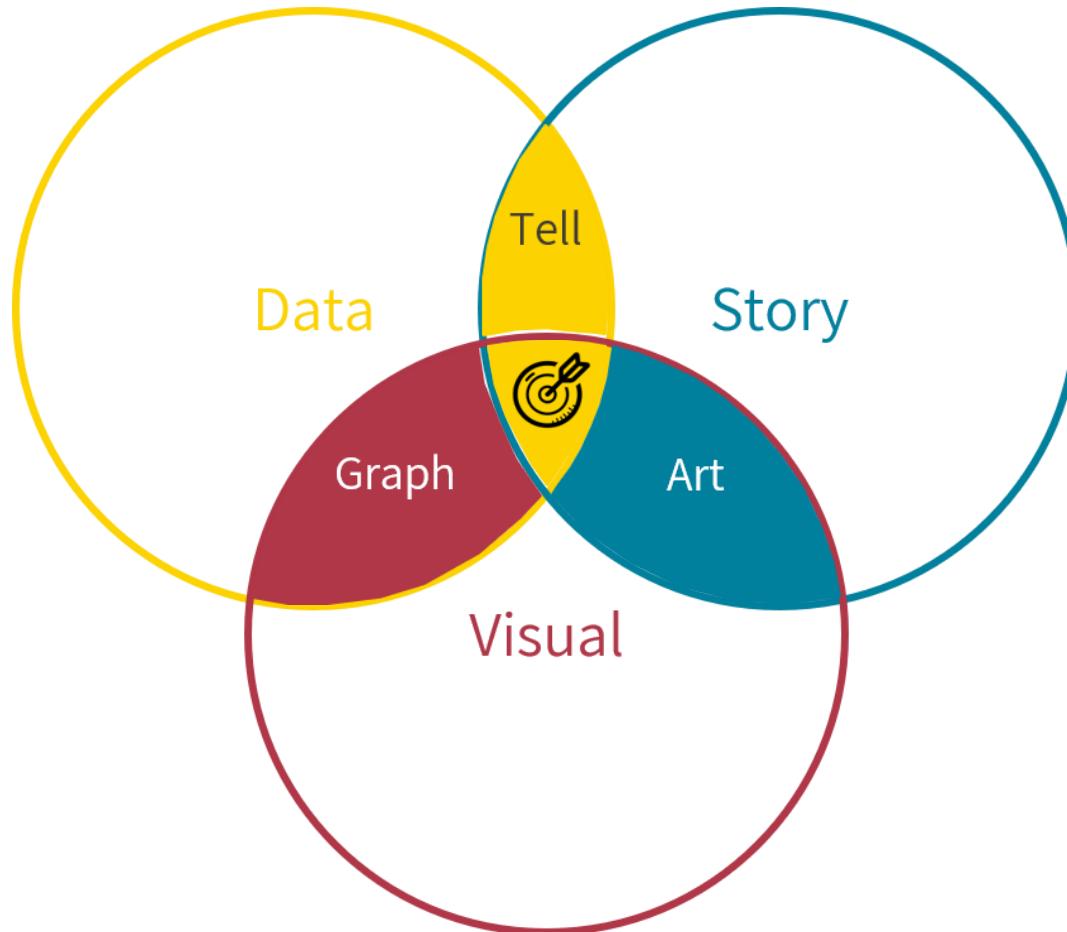

Add context

Make it intuitive

Find the right balance

Define your type of storytelling

Describe

Declare

A photograph of a mountain biker from behind, standing on a rocky outcrop. He is wearing a white helmet, a dark blue jacket, black shorts, and a black backpack. His white mountain bike with red accents is leaning against a rock to his left. The background features a majestic, rugged mountain range with several peaks partially covered in snow and patches of green vegetation. The sky is a clear, vibrant blue.

Recap

- Storytelling is not a science; it is an **art!**
- **Understand** your end-user. Facilitate them with data.
- Send your users on an adventure and make them part of **your** story!
- Add your **identity** (corporate or your own) .
- Power BI is full of great features, **make boring data shine!**
